**TROUBLE FROM COFFEE**  
People Beginning to Learn About the Drug  
"Coffee treated me so badly that I want to tell people about it, and if you can use my letter, I will be glad.  
"I am 45 years old and have drank coffee all my life. I have felt bad for years and did not know what ailed me. Sometimes I would have to press my hand against my heart. I would be in such pain and I got so I could hardly do my work. My head would feel heavy and dizzy, and many a time I got so blind I just had to drop down or else I would have fallen.  
"I felt bad all over. My feet would swell and hurt me. A friend of mine asked me to try Postum and stop drinking coffee. I tried the Postum, but it was some days before I got hold of the right way to make it. My heart disease and drowsy disappeared and I got entirely well.  
"There is much in making it. It has to be boiled longer than ordinary coffee, but when I got it made good, it was fine, and now I wouldn't have coffee in my house at all. I am sure that Postum saved my life, and I am now perfectly well. I send you the names of about twenty people that have been helped by leaving off coffee and using Postum Food Coffee."  
It's worth while to read "The Road to Wellville" in pkgs.

third annual conferring of degrees. Since the graduates of American colleges achieved such noted distinction in 1906, a high spirit of rivalry has existed between them and the Japanese schooled Chinese, and this feeling is increased by the patriotic feeling in Japan, where the number of Chinese students is increasing annually. One of the most noted cases of success has been that of Chee Soo Lowe, of the class of 1906, College of Mining, University of California, who has just been appointed by the Chinese Government to fill the position of mining engineer of the government bureau of mines, at Chentu, Szechuen, China, near the Tibetan border. Mr. Lowe, since his graduation, has been visiting a number of the leading mines in California and other states in the West, so as to familiarize himself with the best American practice. He is one of a number of Chinese mining students who have distinguished themselves in the University of California for good work. He won the respect and good will of faculty and fellow students alike, and they will all rejoice in his success in China.
