position in Hook Bros.' store.

SIDE LIGHTS ON THE HEMET WATER RATES PETITION [Special Correspondence] HEMET, June 11.—Forty taxpayers

## of Hemet filed a petition Wednesda; asking the Riverside county supervisors to regulate and control the rates for domestic water, charged by the Hemet Town Water Company, one of W. F. Whittier's corporations. This is the second demand the people of Hemet have made within the last three months for a legal adjustment of their water rates. The first petition contained thirty-one names (the law requires twenty-five), but Whittier's atorneys picked technical flaws in it, so the petitioners were told by the board to come again. They are now coming again, forty strong, and

with signatures to spare. The cause of all the row at Henset s a set of new fules promulgated in March by the public service corpora tion, which supplies the handsome lit tle town of Hemet with life-giving fluid for home use. The consumers claim that the for

mer rate of \$1.50 per month for each lot, with no quantity limit, was high enough, but the said new rules set them to thinking. These rules fixed the quantity of water which the Hem itite might have for one and a half plunks per month at 200 galions a day. This would give each house 6000 gallons a month, for that money, and is equal to a rate of 25 cents per thousand gallons

The company also took on a busy streak and generously placed a nice httle black iron box in front of the premises of each householder which when opened, was found to contain an active and lively water meter of be five-eighths inch variety.

Now, when the garden hose is played upon the lawn and the cow takes a drink of water at the same time, the meter buzzes dangerously near the limit and sufficient unto the day is not the water thereof at Hemet. For it has been found, through careful experiments, scientifically carried on by competent residents and taxpayers, thereunto duly authorized, that 200 gallons of water will run out through a three-quarter inch hydrant in exactly 141/2 minutes. Hence this hurrying to and fro with petitions and this cry to the board "all terests--Latter to Go in As same" the famous and ancient cry

from Macedonia. It is not that the supply of water is limited at Hemet, heaven forbid, for that favored community is known to have an abundance of it.

The company must either need the money or else somebody has made a nistake in his calculations.

However, after due publication of this second amended petition, the board is directed by the mighty mandate of the act of March 12, 1885, to send for the haughty minions of the company to bring in their books and papers, then and there to explain why hey should not have their rates fixed loctored, regulated, controlled and nailed down for the period of a year,

the young man's left hip, bruising the muscles, but fortunately no bones Ohlmeyer and his Coronado Tent City orchestral concert band appeared in the opera house last evening for
