Dr. Reese has moved into the Payton cottage on the corner of Fifth and B streets.

Personals Miss Nellie Anderson arrived Tuesday noon from the Riverside business college.

Rev. W. J. Millet leaves today for an indefinite stay in Los Angeles.

Mr. and Mrs. Miles Miller of 399 Lime street, Riverside, spent last week with their son, H. W. Miller.

Mr. and Mrs. Charles Cook left this week for San Diego, where she will make her future home.

Prof. Jones, with about 20 of the high school pupils, arrived Saturday morning from San Jacinto.

H. M. Harford, editor of the Progress, spent Saturday on business in Riverside.

Charley Cowles was a morning passenger to Riverside.

All the Newest Creations In spring millinery at Mrs. Louis', 775 Main. Opening begins Thursday. Be sure and attend.

Mound City Paints go farther, wear longest, look best. Franzen Hardware Company.

A Night Alarm Worse than an alarm of fire at night is the metallic cough of croup. Careful mothers keep Foley's Honey and Tar in the house and give it at the first sign of danger.

Foley's Kidney Remedy will cure any case of Kidney or Bladder trouble that is not beyond the reach of medicine. No medicine can do more.

WILDOMAR

Geological Expert Examines Rock Formation—Citizens Sink Wells. Real Estate Deals Are Closed. Farmers Hope for Rain—Purely Personal.

[Daily Press Special News Service] WILDOMAR, March 9.—Prof. R. S. Holway of Los Angeles is making a geologist's inspection of the Santa Rosa range of mountains. He visited Wildomar last week and inspected Mt. Grant, where once, long years ago, occurred a great eruption.

Baisley & Gay are at present engaged in sinking a 500-foot well for T. H. Wilks here all last week on a visit to his artesian flow of water.

John Duling has sold his home west of town, but will not leave here for some time yet.

Looks and feels like a rain coming. Wildomar is all ready and waiting.

Personals Mr. and Mrs. Beard of Corona were guests of W. E. Hansen and wife at their Grand avenue home the first of last week.

M. Peters left for his home in Wisconsin, last week, first taking in San Diego.

S. T. Stephens and family moved to Mr. Ammons place recently, where they expect to reside for the present.

Egan, from Edison, near Bakersfield, was here all last week on a visit to his wife, leaving on the train early Monday morning for home and business.

Mrs. M. Soules and son Neil, who have been enjoying a vacation at the coast towns, returned home on the Monday noon train. It was their first view of the Pacific.

ALVORD SCHOOL DISTRICT NEEDS

Members of Board of Trustees Discuss at Length the Issue Now Before the District Regarding Building Plans.

Alvord, March 9, 1910. Editor Press: Knowing that your paper reaches most of the homes in our district, I take liberty to send you this article, hoping you may give it space in your valued columns.

The writer having made it his business to look into the needs and affairs of this school district, as one of its school trustees, feels quite safe to judge the following subjects, and offers his reasons therefor; particularly now, since we are about to bond the district to erect additional room and to supply our school with an abundant and pure water supply by connecting by pipe line with the pipe delivery system of the Riverside Water Company.

First: At a meeting called for the purpose to discuss these matters, yet attended by only a few who happened to hear of the intended gathering in spite of the regular notices posted, there developed an issue as to whether we need a four or five room building or a two room structure, so built as to contain semi-basement rooms in addition to the large two-class rooms, and wash-basins, a teachers' room and library together with halls so arranged that at minimum cost, later when this district requires more room two additional class rooms, basement, furnace, etc., may easily be added at loss of only \$300 in making connections in addition to actual first cost of the improvement.

(Will say that we now have a one class room building.) It is planned to build two basement rooms to be used as lunch, bicycle fuel rooms, toilets, for manual training quarters and so on under the two class room school proposition.

Entrance to these lower rooms is proposed to be had from separate sides of the building, thus satisfactorily separating the boys' and girls' sides.

The approximate cost of such a two class room structure, complete and modern in detail, would be \$4500 and providing ample school facilities for the next four or five years, perhaps longer, at which time, should our district remain as now, comprising lands as far as the Santa Ana river and including that portion of the Riverside Groves and Water Company's property that will become one of the centers of its future ranch occupancy and building operations—

should this tract become settled upon, I look for a tendency to build another school house, and at no distant time, either.

Meantime their few children would swell our own attendance—all finding room in the additional one room. This entire school board of trustees favor. It would be folly to expect them to send their children across a swampy section to Alvord school indefinitely. When their numbers, added to those living north and east of them, shall have reached a sufficient number, they will have a building of their own close by.

To rush our proposed school through by short time bond issue, for a four or five room building with a four basement rooms, only one half of which can possibly be of use for years, and that we may never use (I cite the large Victoria avenue school as one instance) would be taking undue advantage of them and as Robert Burdette would say, would be like "kicking the kid in the stomach."

To expect and to force an issue now that shall cause that section to help pay for an extravagant school plan by hurried special tax, so that Alvord would have the building paid for ere they got strong enough to become independent would be unfair and dishonorable and avicious, to say the least and contrary to Christian spirit.

The interest even at 6 per cent on the advance outlay of these, now and for years unnecessary expenditures, would be \$1800 alone, to say nothing of deterioration, extra fire insurance, with possible loss of entire structure by fire (for tramps continue to force entrance so they may pass a night under shelter.)

Until paid for our tax would be nearly double, in fact fully so, for the spokesman for the four-room advocate also wants an assembly room, which with the two extra basement rooms, furnace, etc., would total into five extra rooms we can well get along without, as I shall prove.

That gentleman declared that there was objection to "spitting onto the floor of the school room." My stars! I suppose he would then feel free to spit to his heart's desire. So there you are, gentlemen.

The library would be ample for trustee meetings, three men can sit comfortably at a library table. I assure you, or we could meet in the teachers' room. When needed on rare occasions for public gatherings, one of the large school rooms can be utilized, where seats and rostrum are at hand.

Let us be reasonable in our demands, especially when our needs are so clearly outlined. If we need an assembly room, why not move the present school house into another part of our two acres of ground? With its ante rooms and its equipment and large, well lighted and ventilated class room, it would make an ideal public hall; for such, it is well built.

I am told that to sell the present school building would bring possibly \$300 or \$400. It cost \$1600 and it is in an excellent state of preservation having been thoroughly renovated at the opening of this school term.

We should rejoice in our present low tax, 8 cents on \$100 valuation. To build the new two-room school house as planned would increase this tax to 20 cents.

To rush into the extravagant, unneeded expenditure of the 4 or 5-room building would mean much additional on the \$100, almost every cent the law allows, and a hardship it would be I know.

So, we are going to meet again in a few days to try to straighten the tangle, that the matter may be settled by the least friction in the community, since established sides have been taken. It shall be my endeavor to have separate voting issues on the ballot.

First—\$1500. Voting for or against the water supply. (A unanimously favorable expression was taken on this matter at the meeting held Feb. 28.)

Second—\$4500. For two class rooms, two basement rooms and all accessories.

Third—\$9000 and possibly \$9000: To provide for the large structure. These figures are approximate, our architect, S. L. Pillar of Riverside, not having entered fully into that detail, as yet.

Let us have the two-class room building now; we will be fair to our neighborhood and retain their friendship. Let us remember that we can add the extra rooms as we need them; the architect's plans provide for that. Some changes may then be commendable as dictated by modern needs.

Furthermore, also remember the saving of interest, interest on interest, fire insurance, repainting, maintenance, possibly loss by fire, etc., and then vote.

The date of the new meeting will be Monday, March 14, from 7 to 10 p. m. I invite and trust every taxpayer, head of family and voter in Alvord school district may be present; to make it a duty is your business.

Thanking you for your kind attention, I remain Respectfully, W. C. EYMAN.

Silence! The instinct of society natural to every woman is often a great hindrance to the cure of womanly diseases. Women shrink from the personal questions of the local physician which seem indelicate. The thought of examination is abhorrent to them, and so they endure in silence a condition of disease which surely progresses from bad to worse. It has been Dr. Pierce's privilege to cure a great many women who have found a refuge for modesty in his offer of FREE consultation by letter. All correspondence is held as sacredly confidential. Address Dr. R. V. Pierce, Buffalo, N. Y. Dr. Pierce's Favorite Prescription restores and regulates the womanly functions, abolishes pain and builds up and puts the finishing touch of health on every weak woman who gives it a fair trial. It Makes Weak Women Strong, Sick Women Well. You can't afford to accept a secret nostrum as a substitute for this non-alcoholic medicine of known composition.
